THE PRODUCT

- Teknion Expansion Caseworks
- Teknion Expansion Desking
- Teknion Contessa Task Chairs

Photographed by Eric Laignel

Glendale, CA | Pollack Architecture | 4,500 sq. ft. | LEED-CI Platinum

Do you know how furniture plays a role in your LEED certification? Inspired by Citadel's commitment to environmentalism, SideMark created a LEED-CI Platinum furniture solution emphasizing the use of natural light, open spaces, and sustainable materials. With a fresh perspective on traditional working environments, SideMark guided Citadel from hodge-podge furniture and fortress-like cubicles to low-paneled desking, open arrangements, and comfortable seating. But new furniture doesn't need to feel sterile! In the spirit of humor (and just a touch of hodge-podge), a dry-wall painting of the Three Stooges hangs in the cafeteria. Crisp, clean, bright and open, Citadel's employees found the SideMark furniture experience enlightening—literally!
